BROOKS AF BASE, TX 78235-511

3. REPORTING FACILITY (List all locations where animals were housed or used in actual research, testing, teaching, or experimentation, or held for these purposes. Attach additional sheets if necessary.)

### FACILITY LOCATIONS(sites)

AIR FORCE RESEARCH LAB  
BROOKS AF BASE, TX 78235

### REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain- relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS  (Cols. C + D + E)
4. Dogs		8			8
5. Cats					
6. Guinea Pigs			23		23
7. Hamsters					
8. Rabbits			34		34
9. Non-Human Primates	38	9	35		44
10. Sheep					
11. Pigs		17	176		193
12. Other Farm Animals					
Goats			2		2
13. Other Animals					

### ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

### ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

RE: Annual Report of Research Facility – The University of Texas at Austin  
(#74-R-0029/1453)

Dear Dr. Gibbens:

Enclosed please find:

- The 2006-2007 Annual Report of Research Facility (APHIS Form 7023) for The University of Texas at Austin (Registration Number: 74-R-0029; Customer Number: 1453).
- An attachment to APHIS Form 7023 describing facility locations.

In addition to the Annual Report, there is one additional item we would like to include:

- 1) The Institutional Animal Care and Use Committee (IACUC) of The University of Texas at Austin was granted exception concerning fluid restriction in non-human primates. Two investigators were granted IACUC approval to utilize carefully monitored water control as a motivational tool. During this reporting period, ten ( $n = 10$ ) non-human primates were used under this exception.

If you have any questions or require further documentation, please do not hesitate to contact me at (512) 471-2877.

Sincerely,

Enclosures

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

PART 1 - HEADQUARTERS

**Texas Heart Institute, Registration no. 74-R-0037 / 1478**  
**Attachment to 2007 Annual Report to USDA**

A total of 29 calves and 18 sheep on 9 separate IACUC-approved protocols were confined to a stanchion for the minimum period of time necessary to accomplish the objectives of the approved research protocols, sometimes exceeding 24 hours, in order to provide proper care during the post-operative period, and to prevent harm to the animal during this period. The IACUC reviewed and approved the explanation and justification for "extended restraint" in each of these protocols.

To: United States Department of Agriculture (USDA)

From: [REDACTED]

Subject: USDA Exception Summary  
Oct. 1, 2006 – Sept. 30, 2007

The IACUC approved 3 exceptions to USDA regulations during the reporting period. All 3 exceptions were to house animals in cages that provided less than the approved floor space for the species.

Two protocols were submitted to house rabbits in cages that provided less than the required square footage for a period of up to 4 days. The space restriction was required to restrict the animal's movement following application of an intravenous catheter for continuous infusion, indwelling urinary catheter, and urine collection system. This exception was reviewed and approved by the IACUC. Thirty-five rabbits were approved for this exception during the reporting period.

One protocol was submitted to house dogs in intensive care cages that provided less than the required square footage for a period of up to 6 hours. The intensive care cages were required to provide supplemental heat to the animals following a procedure. This exception was reviewed and approved by the IACUC. Eight dogs were approved for this exception during the reporting period.

## IACUC-Approved Exceptions

Rabbits – 12 offspring during this reporting period

The IACUC has approved the use of a leaf of hay rather than a nest box for rabbit offspring less than one month of age. The sides of the cage and the flooring protect offspring from getting entrapped or falling through the cage sides or floor. By eliminating a hard-sided nest box, there are fewer incidents of offspring getting trapped and squeezed between the cage walls and the nest box. The hay provides a safe haven for the offspring in breeding cages of this design.

Monkey – one monkey was affected by this exception

An exception to the cage space requirements for nonhuman primates was approved because the caging system provides the monkey with sufficient volume of space (almost 2X the required cage volume) and the opportunity to express species-typical behavior.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain- relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS  (Cols. C + D + E)
4. Dogs					
5. Cats					
6. Guinea Pigs					
7. Hamsters					
8. Rabbits	2	10			10
9. Non-Human Primates					
10. Sheep					
11. Pigs					
12. Other Farm Animals					
13. Other Animals					

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

PART 1 - HEADQUARTERS

APR 18 2007

Subject Fw: AR Cat E; MODIFIED RESPONSE (2nd reply), from  
FabGennix 74-R-0182, 14297

History:  This message has been replied to.

Per discussion, with these clarifications their AR is now accepted.

I spoke with [REDACTED] the new attending vet for FabGennix's, ( 972 387-4168) who will in the future be taking over the responsibility of submitting the annual report.

I asked her our two questions 1. What is the method of euthanasia? She responded that an overdose of barbiturate based on the weight of rabbit.

2. How much blood is being collected? She stated the less than 10% of blood volume, not body weight, however much less is actually being collected

She said she would be reviewing the SOPs and protocols, and would work with [REDACTED] on any questions she may have.

If you need more of a follow up, will need to go through [REDACTED] I'm off on AL until the first of February.

FabGennix, 2nd reply.pdf

[REDACTED]  
Since your and [REDACTED] Dec 18, 2007, visit with FabGennix, we have received another cover letter

(attached) for FabGennix's Annual Report, and this appears to be the "modified" report you indicated they would send. However, it still states "...collection of a production bleed less than 10% of the total body weight of rabbit as per FGI.SOP-8.1-101..." and "Euthanasia (sic) procedures are as per AVMA guidelines of euthanasia, Formerly report of the AVMA..." They have simply removed mention of the use of decapitation and cervical dislocation, without specifying how the animals are euthanized.

██████████ and I met this morning as to how to proceed with this Annual Report. While they have addressed our initial inquiry about death as an endpoint, they have created a possible additional Cat E issue with the amount of blood they state they are taking ("less than 10% of total body weight"; this amount would exsanguinate an animal since the total blood volume of a rabbit is 5-10% of its body weight). Additionally the SOP they reference talks about serum collection, not blood collection; serum is about 1/2 of the blood volume, so they would need to collect about double the amount of blood to get the serum amount needed).

So, for ██████████ to be able to approve this Annual Report, would you please confirm: 1) FabGennix blood collections are 3% or less of total body weight and 2) confirm HOW the animals are euthanized, since FabGennix has not specified the method(s) since dropping the mention of decapitation and cervical dislocation.

Please respond by email as we need a hard record for the file; copy ██████████ (to keep ██████████ in the loop on the outcome). Thank you.

December 18, 2007

Ref: Explanation for amendment in the annual report 2007.

In our IACUC approved protocols for production of anti-peptide antibodies in rabbits, in none of the research protocol "death is an endpoint" - immunized rabbits can live in good health for their natural life span.

All animals (rabbits) under FGI.SOP # 8.1-101 are handled and cared for as per description. The rabbits are immunized using 20 gauge needle via subcutaneous injections with minimal pain. The animals are under observation for one hour after injection and any sign of distress or discomfort is cared for by oral supplementation of pain killers "Tylonol" as per SOP#8.1-101. Visual inspections are made for any abscesses sores and general health problems. Appropriate actions are taken as noted in SOP if any of these conditions apply. Post injection observations are made next day for evidence of pain or distress. These observations are made at least one time per day during the entire protocol.

At the end of the standard 70-day protocol, principal investigators are required to inform in writing, or verbal approval to:

Either terminate the project or extend these protocols on a monthly basis. FabGennix Inc. will contact investigator on day 56 (week 8) to inform about the completion of the standard protocol within the next 2 weeks. (At this time FabGennix Inc. will continue to hold and care for animals for an additional 6 days at no cost to investigator). The investigators are expected to determine at this point whether to continue project on a monthly basis. This action leads us to continue the booster injections as listed in the SOP and collection of a production bleed less than 10% of the total body weight of rabbit as per FGI.SOP-8.1-101 (approximately 30-40ml blood) or terminate the project. The animals are euthanized under the supervision of veterinary care program for practical reasons when it is determined that there will be no more need or demand for a specific antibody produced by a rabbit.

All our standard operating protocols are approved by our Institutional Animal Use and Care Committee (IACUC). The copies of these documents are also available at the facility. Euthanasia procedures are as per AVMA guidelines of euthanasia, Formerly report of the AVMA Panel on euthanasia, June 2007.

**REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY** (Attach additional sheets if necessary or use APHIS FORM 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain- relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS  (Cols. C + D + E)
4. Dogs	0	0	0	0	0
5. Cats	0	0	0	0	0
6. Guinea Pigs	0	0	0	0	0
7. Hamsters	0	0	0	0	0
8. Rabbits	62	141	40	0 181	243
9. Non-Human Primates	0	0	0	0	0
10. Sheep	0	16	0	0	16
11. Pigs	0	0	0	0	0
12. Other Farm Animals	0	0	0	0	0
13. Other Animals					
Llamas	0	2	0	0	2

**ASSURANCE STATEMENTS**

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.
